HAITI CENTER IMPROVEMENTS

In environments where resources are limited, proactive care of facilities is an act of wise stewardship. These improvements safeguard key ministry spaces, protect people and assets, and ensure that outreach and discipleship can continue without unnecessary disruption.

Ferrier Center

Admin Building Repairs

The Administration Building at the Ferrier Center requires both roof and interior repairs to address wear, leaks, and structural deterioration caused by prolonged use and environmental exposure. Completing these repairs will protect the building, safeguard equipment and workspaces, and restore a safe, functional, and welcoming environment for staff who support daily ministry operations.

Ouanaminthe Center

New Gate on Main Pitch

The main pitch at the Ouanaminthe Center is one of our most active outreach and discipleship spaces. Installing a new gate will improve security, protect equipment, and help manage access during league play and community gatherings. This upgrade supports both safety and stewardship of a heavily used ministry asset.

Partnership Request

Thank you for your heart for the ministry and those we serve together. By helping us care for the people and physical spaces of our centers, you strengthen the foundation that supports long-term impact. Thank you for prayerfully considering funding these projects.

FERRIER CENTER ADMIN BUILDING REPAIRS	\$ 8,500
OUANAMINTHE CENTER PITCH GATE	\$ 4,500
<hr/>	
TOTAL	\$ 13,000
